

AMENDMENTS

Specification Amendments

Please amend the specification as follows:

Substitute the paragraph starting at page 19, line 15 with the following:

Performance manager 204 receives audio content input from audio source 402 and produces audio instructions for input to the audio rendition manager 206. Performance manager 204 includes a segment component 414, an instruction processors component 416, and an output processor 418. The segment component 414 represents the audio content input from audio source 402. Although performance manager 204 is shown having only one segment 414, the performance manager can have a primary segment and any number of secondary segments. Multiple segments [[in]] can be arranged concurrently and/or sequentially with performance manager 204.
